

I genuinely don't believe I would have been able to make it through the entire process of applying to law school without Jonathan. I should start off by saying that Jonathan's technique and methods of learning are unlike any other. He has a way of breaking down the material, putting it in its simplest terms and adhering his methods towards each individual student. Not only was his instruction incomparable, he was able to tackle the mental aspect of the LSAT and bring out my confidence in a way I never thought possible. Having Jonathan as a tutor for 8 months was worth every penny and I could not recommend a better instructor.
