I found Jonathan's information on a random 7sage post from years ago, and boy am I glad I did. He is extremely personable, funny, and made learning the LSAT enjoyable. I always looked forward to our sessions. I started working with Jonathan after my first attempt at the LSAT which I took after self-studying. I was familiar with a lot of the basic concepts which made the time I spent working with Jonathan even more worthwhile. His ability to diagnose your weaknesses and help you work through them was incredibly helpful. My favorite thing about his teaching style is that he lets you use methods that work for you and simply helps you fine-tune them. I highly recommend working with Jonathan Wang.
